

Customer Notes - March 22nd

Team 1 - Pixel Odyssey

The first team has paper links at each profile

Total number of members

Total number of research interests

Impressive change

Huge improvement from the last time, they have improved the functionality

They are talking about the scrapping of data, this team already scrapped the data

Suggestion of stay & play by reorganizing the sections

They still have the mission, vision and value.

The photos are distorted

Improve search bar with suggestions

Team 2 - Bob the Builder

They are still using BuddyPress

"Community Page" - Activity page

They kinda like the idea of discuss topics

There are a lot of elements very similar to a social network, they don't want that

The Friend feature is part of the plugin

It is a big improvement

Check the plug in consideration, they don't want to have friends (It is not a Social network)

Is it like follow? Might be interested? They don't know

That is a nice to have

They are asking about the papers

Team 3

They are asking about the "Communities"

They seemed to be different groups when it is not like that

Canada map at the homepage

Interactive Wordcloud

Be careful with the bilingual map

Team 4

They are still using BuddyPress

The research interests are static

It is a useful forum to keep the conversation, but they want a separated page to keep the scrapping

Canada doesn't want the French Flag

Typos on the main page are surprising

They challenge them to stick on the website

Good job

Team 5

They are managing groups

They have dummy data

The SIG is at the same level of UX and Gaming

They are managing them as groups

The customer doesn't want a contact form?

Moderator can manage things, but maybe the customer do not want that

Improve the stay&play

Capture the user to invite them to play

Team 6 - SnapPapers (Our Team)

Good work

Word cloud impressive

Manual developed

The Word cloud is cool

The papers are not dynamic, but it will be

Trends are not dynamic, it will be connected to the papers info

They liked the map

Great work

Looking good

They will be dynamic

The member sign up is interesting

It will be better to not allow the people to register their own pages

They will need a very limited credential for the user

The customers are happy
