

- Feedback For Our Team **SnapPapers**

- We need to focus more on the researchers than the papers that they have published
- Also, the website should be accessible to all the users who are not SIG members; they should be able to create a profile after they register.
- We need to add relevant information to our bubble chart also it should be more researcher-centric than paper-centric
- They don't like the Geolocation map because of the address information. Separate CEEA and SIG ID.
- We can explore the use of Bubble Chart with researchers.

- Overall Feedback

- SIG website should have low-maintenance
- Also, try to avoid the feature that needs admin
- If we are displaying papers then we need a mechanism to link CEEA's database with SIG's website.
- Promoting more researchers to be part of SIG is the main objective
- Map of Canada with data insights.
- Communication page not necessarily.
- Visual representation of categories.
- They want accessibility for everyone to have our own search engine like Google.
- Look for websites that promote people. Minimum maintenance for maximum impact.
- Prioritize needs. Networking and promoting.
